Lord Monck's Dispatch respecting the admission of British Columbia.

Through the committee appointed at the Confederation meeting last January, we are enabled to lay before our readers a report of the Privy Council of Canada respecting the admission of British Columbia into the Dominion, and Lord Monck's despatch transmitting the same to the Duke of Buckingham. Our readers will not fail to observe the earnestness with which the Canadian Cabinet have taken up the question of our admission. There is a marked contrast between their promptitude and that of our Government in the matter, which speaks well for the honesty of the Canadian Government. The resolution of the Legislative Council asking Governor Seymour to negotiate with Canada

without delay was passed March 10th, 1857; yet from the appended report it would appear his Excellency made no official communication to Canada on the subject, although it cannot be forgotten, that immediately after the resolution was passed, he expressed himself in favor of immediate admission. We confess we cannot but admire the promptitude of the Canadian Cabinet as it stands in contrast with the supineness of our own authorities. The memorial of the Victoria committee was written and despatched on 1st February last, and on March 7th, just five weeks afterwards, a despatch is transmitted to England in favor of Confederation with British Columbia.

Copy of a Report of a Committee of the Honorable the Privy Council, approved by His Excellency the Governor General in Council, on the 6th March, 1858.

The Committee have had under consideration a Memorandum dated 5th March, 1858 from the Honorable the Minister of Public Works, stating that certain Resolutions on the subject of Union with Canada, adopted at a public meeting of the inhabitants of Victoria, British Columbia, on the 29th of January last, transmitted through the Honorable S. L. Tilley to the Secretary of State for Canada, were on the third instant referred to a committee of the Honorable the Privy Council, and by the Council referred to him the Minister of Public Works for immediate Report. That he has read and duly considered the purport of these resolutions, the circumstances under which they were passed and the action which ought to be taken by the Government of Canada thereupon.

That it appears from these Resolutions and the Memorial of the Committee appointed at the public meeting, which accompanies them, that the Legislative Council of British Columbia, on the 18th of March, 1857, unanimously adopted a Resolution requesting His Excellency Governor Seymour "to take measures without delay to secure the admission of British Columbia into the Canadian Confederacy on fair and equitable terms."

That it appears further that neither the people of British Columbia nor the Government of Canada have been apprised of any measures that may have been taken by the Government of British Columbia, in pursuance of the Resolution of the Legislative Council.

That the Resolutions adopted at the public meeting of the 29th January, which were called and presided over by the Mayor of Victoria, the chief of the Colony, and the statements of the memorial signed by the Mayor and by Members of the Legislature and others, leave little room to doubt that the people of that Colony are willing and anxious that it should be admitted into union with Canada if the terms of admission can be agreed upon.

The Minister of Public Works calls attention to the 14th section of the British North America Act, which applies to the case of British Columbia in express terms. That it will be seen the Resolution of the Legislative Council was passed before the British North America Act came into force, and that it did not specify the terms of admission which the Council asked the Government to secure.

That it is evident therefore that further action is necessary by the Legislature of British Columbia, before admission can take place under the provisions of the Imperial Act.

That it is suggested in the Memorial of the Mayor and other citizens of Victoria, that the Legislature of the Colony, being largely composed of officials, is not so zealous for Confederation as the people whose wishes and opinions it ought to represent.

The Minister submits, that considering the peculiar Constitution of the Legislature and Government of British Columbia, and that, notwithstanding the Resolution of the Legislative Council in March of last year, and the Resolutions of public meetings and the expressions of opinion through the Press of the Colony before and since the act of Confederation, in favor of union with Canada, no official communication on the subject from British Columbia has reached this Government, he would recommend that Your Excellency communicate to His Grace the Duke of Buckingham a copy of the Memorial and Resolutions referred to, and request His Grace to instruct Governor Seymour to take such steps as may be deemed proper to move the Legislative Council of British Columbia to further action in terms of the Imperial Act. He further recommends that His Grace be informed that the Government of Canada will be prepared to submit to Parliament a proposal for the admission of British Columbia into the Union, in the expectation that the Imperial Government will lose no time in transferring the intervening North-Western Territory to the jurisdiction of the Canadian Government.

The Committee concur in the above recommendations, and submit the same for Your Excellency's approval.

Certified.

Wm H Lee, C.O.

To the Honorable the Secretary of State, Canada.

The Governor General to the Duke of Buckingham and Chandos.

(Copy—No. 35.)

GOVERNMENT HOUSE,

Ottawa, 7th March, 1858.

MY LORD DUKE,—I have the honor to transmit, for Your Grace's information and favorable consideration, an approved minute of the Privy Council of Canada, on the subject of certain Resolutions adopted at a public meeting of the inhabitants of Victoria, British Columbia, with reference to the desire of that Colony to be incorporated with the Canadian Union.

I have, &c.,

(Signed.) Monck.

His Grace the Duke of Buckingham and Chandos, &c., &c.

At the St. Patrick's dinner, last Tuesday, there were two or three matters which escaped the attention of the reporters—at least of the Times. The Prince of Wales had to propose the toast of "the Army and Navy, and the Volunteers," as it stood on the list, but, with excellent taste, he interpolated after "the Navy" the words "and I must add, the Militia," and thus corrected a mistake of the framers of the toast-list, although his Royal Highness could not amend the omission so far as to call on some officer of the Militia to return thanks for the old constitutional force of the country. Why should not the Prince of Wales become "Lord of Ireland?" asked one of the enthusiastic guests. It is an old title of honor, held not indeed by heirs-apparent, but by kings of England, ere they assumed the style of "Rex Hibernia." For many centuries the kings of England were

plea is that they have ever been loyal to their liege lords. Lord Longford's excellently terse, clear, and energetic speech, which was well received through the hall, eliciting, at its close, loud plaudits, was burked, although he made some capital bits and spoke with great confidence of the present and future of the Army. It was remarkable enough that his lordship, who has served in high positions in the British Army in two great wars—the Crimean and the Indian—and in campaigns of much interest, had a kind word to say for "the adventurous gentlemen" who act as special correspondents in war times, and alluded to the presence in the room of the correspondent whom he described, perhaps not quite correctly as far as the Press is concerned, though accurately as far as the British Army stands, as the founder of the "sect" which Mr Kinglake has yet got to put his mark upon more distinctly. Again, all the point and fire of Mr Corry's admirable little speech were quelled in the report. He made a capital coup apropos of St. Patrick's voyage, which was quite warded off by the reporters. He said it was quite clear that St. Patrick had not made his way to the *statio bene fida carinis*, for if he had done so he would, no doubt, have saved the present Government a deal of trouble by including in his useful works the annihilation of "Daunt's Rock." It is not, we hear, improbable that one of the new ironclads will be called the St. Patrick, and we dare say, if it be so, the mailed saint will do more than the great patron of the Green Isle to banish venomous creatures from our shores. Who is the *Pall Mall Gazette's* "nasty man?" He is very nasty—a petty, carping, canine Zolius, who snarls at the smallest and yelps at the greatest with cynic mouth through voracious teeth? Now there is a vicious snap at the comic singer and his dreary songs—anon, a bitter bite at the Prince of Wales—always a stringent bow-wow-wow at something or other, from Oxford Christianity to Oxford boating. Even the very infinitely littlest of the gifts of the diners at Willis's Rooms, who would not eat their cakes, grapes and oranges in order that they might give them to the little boys and girls who marched past the Prince, does not escape a snap, because, perhaps, the truth might reach the Prince. The fine burst of bow-wow on behalf of the poor proprietor of Willis's Rooms, who was robbed of his oranges and almonds and raisins, suggests the idea that dogs were deprived of a reverential interest in the cakes, or was interested in the contract.—*Army and Navy Gazette*.

AMAUROSIS CAUSED BY TOBACCO SMOKING.—A paper on Amaurosis from tobacco smoking was lately read before the Medical-Chirurgical Society in England by Mr Hutchinson. The author adduces evidence to prove that the form of nervous blindness, known by the name of amaurosis, is frequently produced by excess in tobacco smoking. Of the thirty-seven cases which Mr Hutchinson recorded, thirty-one were smokers. The history of the patients and the most successful mode of treatment led Mr Hutchinson to the following conclusions: 1. Among the men, this peculiar form of amaurosis (primary white atrophy of the optic nerve) is rarely met except among smokers. 2. Most of its subjects have been heavy smokers—half an ounce to an ounce a day. 3. It is not associated with any other affection of the nervous system. 4. Amongst the measures of treatment, the prohibition of tobacco ranks first in importance. 5. The circumstantial evidence connects the disease with the use of tobacco and as a cause deserves the serious attention of the profession.

BOUND TO GET MARRIED.—A couple recently presently themselves at an English church to be married. The clergyman, perceiving that the bridegroom was drunk, refused to perform the ceremony, and after administering a reprimand to him, told the bride to return with him the next day. The couple did return the next day, when the bridegroom appeared to be even more drunk than he had been the day before. The clergyman then addressed the bride, and asked her how she could think of uniting herself to such a confirmed sot. The girl replied with touching naïveté: "Willy is not a confirmed sot, sir; but when he is sober he does not want to marry me, so I cannot help bringing him here drunk if I am to marry him at all."

THE BRITISH COLONIST.

Saturday Morning, May 23, 1868.

The Loss of the "Louisa Downs."

The following correspondence confirms the report of yesterday's report of the loss of the above vessel has been handed us:

Bella Bolla, 12th May, 1868.

We arrived here two hours ago, and are taking in wood; had a very rough passage across the Sound last night, and nothing but a good hauler saved the bark. The "Wyanda" left here five hours before our arrival. At Fort Rupert we heard of the loss of an American schooner at Nah Whitt, eleven bodies had floated ashore. I think it must have been the "Louisa Downs," Capt Sullivan, who left Port Townsend a month since with twelve Blackfoot miners for the Stiken River.

A RIGHT MOVEMENT.—DeWolf & Co., of Liverpool, have given free passage to about 350 Irish persons, of both sexes, for Rio Janeiro, where they will get land at a shilling per acre and have five years to pay for it. Brazil has over fifty foreign colonies, with about 70,000 colonists, chiefly Germans. If something of this sort were adopted in this Colony it would be the wisest of wise measures. It is not always a good policy to adhere to the government price for unoccupied lands. One good industrious settler, who makes a home in the interior by redeeming the wilderness is worth more to the country and government than ten unoccupied sections. That this Colony has great inducements for agricultural immigrants, is proved by the fact that some of these who have so far passed the avocation of farming. Throughout Saanich, Cowichan, Comox, the tributaries of the Fraser, from Cache Creek to Quenel-moth, the farmers as a general thing have been more successful than any other class, and present a strong inducement to others to imitate their enterprise.

A MISTAKE.—A resolution has been offered in Congress to enable foreigners to become President of the United States after fourteen years residence. This is carrying democratic liberalism too far. A man secretly disliking America and her republican institutions might thus become President, and in the case of foreign war ruin the country by betraying its secrets. Such a sacrifice of private honor is not too extravagant to anticipate since Arnold lived. If this resolution is carried, it will inevitably lead to other changes, until the present constitution is no longer recognizable. No one but a native born American should ever be President. After all, perhaps, it is nothing more than a bid for the immense Irish democratic vote at the next Presidential election.

The steamer Douglas arrived from Nanaimo last evening. She reports the Active delayed on account of not being able to get her coal; owing to the pressure of business she cannot obtain her usual complement. The Active would leave Nanaimo about 3 o'clock yesterday afternoon, and will sail for Portland not later than 8 o'clock on Sunday morning. The Douglas brought considerable freight, but owing to the press of business at Nanaimo, not so many excursionists as anticipated came down. She reports severe gales along the coast.

POLICE COURT.—George Feltham was before the Police Court for stealing \$70 and a box of cigars from Mr Howard of Esquimalt. Remanded. Two Hyab Indians broke into the store of Mr Phillips of Fort street, and were sentenced each \$20 or in default of payment two months imprisonment. These dark sons of the forest had commenced the Royal birthday, and getting drunk, wanted more liquor, so helped themselves to Mr Phillips' champagne. That was the defense, and certainly it is cool and refreshing like the champagne stolen. They were arrested by night-watchman Vinter.

ST. GEORGE HOTEL.—This building before alluded to is now complete in its refittings and appointments, and is ready for the reception of guests. A ladies' parlor has been added to the hotel. The proprietor, hopes for a fair share of the patronage of the public, and having been shown over the premises we can ourselves recommend it as deserving of support.

THE TRIP TO ESQUIMALT.—We are requested to say that the Enterprise will leave the Hudson Bay Company's wharf on Monday morning at half past ten punctually, in order that excursionists may have full time to inspect the flag ship and be back before the commencement of the races. With a continuance of such weather this excursion cannot be otherwise than very enjoyable.

THE REGATTA.—It must be understood that the steam launch will make but one trip in the morning, unless the convenience of the committee require it. In the evening she will make two trips if necessary to suit the convenience of those who took tickets for the trip up. The first race will commence at one p.m. sharp.

We have the pleasure to announce the Sing Verin, in honor of the Queen's Birthday, will have one of their social evening parties on Monday night, at the Germania Hall, Yates street. Dancing to commence at 9 o'clock.

ROYAL HOSPITAL.—There are at the present time in this institution eleven patients two or three of which are bad cases. The building is to be lime washed by hands from the gunboat Forward, a wholesome action in more senses than one.

A ROMAN CATHOLIC Hierarchy is about to be established in Scotland. The Archbishop or Cardinal is to be Bishop Lynch, now residing at Carstairs; and Father Parkinson, an Oxford convert, will be Bishop of Glasgow.

The wires being down the last two days, between here and Portland, we are without our usual telegraphic dispatches.

FOR SAN FRANCISCO.—The bark Gem of the Ocean arrived yesterday in the harbor from San Francisco, on her way to Burrard Inlet to load with lumber.

The steamer Rotorprise left for New Westminster yesterday morning. She took her usual amount of freight and a few passengers.

"THE LIFE OF THE FLESH IS IN THE BLOOD," was said by inspiration long before Harvey's discovery of its circulation had brought to light its purposes and uses. How we know not only that "life is in the blood," but that disease inhabits it also. Many of the disorders that pervade the human frame, have their home in it, thrive and grow in it. The celebrated Dr. J. C. Ayers, of Lowell, has had regard to this important fact in making a Remedy to cure these disorders. His Extract of Sarsaparilla purges out the impurities of the blood and induces a healthy action in it that expels disease. This looks reasonable, and it is true, for we know by our own experience. Seldom as we taken any medicine, we have nevertheless several times been under obligations to the skill of Dr. Ayer for the relief which his remedies never fail to afford us when we are obliged to have recourse to them.—*Catholic Herald, N. H.*

Naval.

(From the Army and Navy Gazette.)

THE FLORA 40, stationary ship, Capt. Arthur Wilmshurst, at Ascension. The Lords Commissioners of the Admiralty have given directions for a tablet to the memory of Samuel Toms, late boatswain's mate of the Flora, to be erected in St. George's Church, Stonehouse, in consideration of his gallantry in saving life from drowning. On four occasions he risked his life to save shipmates from drowning, and on the last occasion his long and great exertions brought on an illness from which he died. The tablet will bear the following inscription:—"Sacred to the memory of Samuel Toms, late boatswain's mate of H. M. S. Flora. This brave man on four occasions risked his life to save shipmates from drowning. Three times he was successful; on the last occasion his long and great exertions in the water brought on an illness from which he died, on board H. M. S. Megara, on the 19th November, 1867, on the voyage home from Ascension. He wore the medal of the Royal Humane Society conferred upon him for his gallantry. He was a dutiful son, and the sole support of his aged mother. To the end that his courage and humanity may not be forgotten, the Lords Commissioners of the Admiralty have caused this tablet to be erected. February, 1868."

TERRIBLE, 19, paddle-frigate, Captain Joo. E. Comerrell, V. C. B., left Malta on the 8th inst. for England, having been detailed to the Coast of Asia Minor on transport service, and attached to the expedition of excavation which has been for some time laboring at Ephesus. She has on board the monster Turkish gun, so famous in the history of Stamboul, which has been obtained for the English Government in exchange for two Armstrong pieces of cannon. She also conveys some packages of antiquities exhumed at Ephesus, to add to those before deposited in the secret wooden shed at the British Museum. She has, besides the above, some fine and valuable ancient armor from Rhodes. The last named acquisition will probably be seen by the public before the second, although both are to go to the British Museum.

WATERWITCH, iron hydraulic, armor-plated gun vessel, Commander Philip R. Sharpe, at Plymouth, went out of harbor on Monday to the anchorage in the Sound, where she awaits a favorable opportunity to go outside to test her machinery and speed. On Tuesday last, by the direction of the Lords Commissioners of the Admiralty, a silver watch with a suitable inscription was presented to John Otterson, leading stoker of the Waterwitch, by Captain Preedy, C. B., in the presence of the ship's company, to mark their lordships' sense of the example and encouragement displayed by him in remaining at his post when the seas were pouring down torrents during the recent passage of the Waterwitch from Portsmouth to this port. Copy of inscription on watch:—"Presented by the Lords of the Admiralty to John Otterson, H. M. S. Waterwitch, for exemplary conduct, and showing a good example in a time of danger."

SCOUT, 21, screw-corvette, Captain John A. P. Price. A Naval Court of Inquiry was held on the 30th of November at Zanzibar, before Her Majesty's Political Agent and Consul at that port, Captain Price of the Scout, C. F. Gulliver, and Captain Athey, of the British ship Retriever, concerning the loss of the schooner Curlew on the 17th of last April, off Brava. The Court in its decision acquitted the master of all blame. At the close of the proceedings the Court marked its approbation of the high conduct mentioned by the master and crew—namely, that for seven months his Highness the Sultan of Zanzibar treated the shipwrecked crew with every humanity and kindness. We understand Lord Stanley has sent out the thanks of Her Majesty's Government to his Highness Sayd Majid for his conduct.

FREDERICK WILLIAM, 74, screw Con- guard ship, Captain J. J. Kennedy, C. B. A detailed account is given in the Limerick Chronicle of a torpedo found some weeks ago in the upper room of a house in that city, from which the reputed head centre Murphy, a noted Fenian, was arrested. This machine was taken to the Newcastle race-course in a cart, and taken to pieces there with great caution by an engineer officer of the Frederick William, by Mr Hall, sub-sheriff of the city, an amateur pyrotechnist, and others. It has been found to be an American torpedo of excellent construction and could have been used to blow up a ship or building, or set fire to any edifice containing brick work. It is an apparatus of zinc, comprising a large cylinder or float, coneshaped, with ends, about three feet long and twelve inches in diameter, to this is attached two smaller cylinders, about two inches in diameter, projecting at both ends a few inches beyond the large cylinder, to which they are attached by zinc or iron bands. At the base of each cone of the larger cylinder is a ring, intended for a small chain or a piece of rope to hang from, for the purpose of mooring the machine in a river or harbor. The contents of the charged tubes were highly explosive at the percussion or capped ends, where a detonating substance was placed, but at the other ends and beyond the centre the material was not explosive. A particle of the detonating substance when struck on an anvil exploded with great noise, and it was supposed that the smaller of the glass semicircular tubes contained nitro-glycerine, but it has not yet been subjected to examination.

Overland Route from Canada to British Columbia.

(From the Canadian News.)

SIN:—In the report from the Morning Star on the paper which I read at the last meeting of the Geographical Society, and which was inserted in a recent issue, I notice two mistakes. First, the dimensions attributed to the Chilcooten Plain are those of the Saskatchewan territory; and secondly, when speaking of the distance from Butte Inlet to Collingwood, the words "Georgian Bay" have been inadvertently employed for "Butte Inlet." With the exception of these two mistakes, which those conversant with the geography of the country will have readily understood, but which might mislead outsiders, the report is a correct one—but incomplete inasmuch as no mention is made of the the concluding remarks on the urgency of a direct communication between the Canadas and the Pacific through British territory, nor of the discussion which followed.

Now, in reference to this, I explained to an attentive and in a great measure unprepared audience, that a railway is in progress from California to New York, accompanied by the most unheard of difficulties; that in the mountains of the Sierra Nevada, sloping roofs had been constructed to protect the line from avalanches (an entirely new idea in railway construction), and that the road will pass over what is commonly called the Great American Desert, a vast tract of country destitute of wood and water—dry, barren, and unfit for the habitation of man, and yet in spite of these drawbacks, and though San Francisco possesses no coal for steamboat purposes, it is proposed to open a railway in 1874 with a view to the commerce of the world. Passengers, mails, the precious metals, and the lighter and costlier kinds of goods will certainly pass over it, and, as I said, it is calculated to divert a great portion of the trade of China, Japan, and the East from the Old to the New World. Mail steamers liberally subsidised by the American Government are already carrying on a most important and increasing traffic between San Francisco and China, a fact of which we hear not one word in England; a subsidy has also been granted and came into operation in November for a mail service to the Sandwich Islands; and in 1870, when all these combinations will have come into full blast, England will wake up, when it will be too late to recover it, to regret the loss of her trade with the East. In vain have I been attempting to warn my countrymen of this danger and in some measure to avert it; but what can one man do? In British Columbia the Colonial Government systematically opposed my plans because they were contrary to the interests of the present capital New Westminster, and here every one is too much absorbed in his own affairs, and consequently too ignorant of the question, to think about it, care about it, or even understand it.

The truth is, the interests of Canada and British Columbia, however identical with those of the mother country (a thing which England will find out one of these days), are generally overlooked or neglected in this country. But what would become of the dominion if deprived of a communication with the Pacific, so essential to her development, to her maritime prosperity, to her dignity, to her independence, to her very existence? And what if the communication be opened too late? Captain Richards said with truth at the meeting "that a communication between the colonies of Canada and British Columbia would be the salvation of both;" and when we see the vastly greater engineering difficulties surmounted by the Americans in their San Francisco route, as compared with those from Canada to the Pacific, it would be a lasting disgrace if we did not hasten to rival them and avail ourselves of the facilities which nature has afforded us. British America is one in interest, and together with the mother country, must be one in purpose if the danger with which both are menaced is to be averted.

I am sir, your obedient servant,
ALFRED WADDINGTON.
London, March 17, 1868.

THREE THOUSAND YEARS OLD.—The oldest relic of humanity extant is the skeleton of one of the earlier Pharaohs encased in its original burial robes, and wonderfully perfect, considering its age, which was deposited about eighteen or twenty months ago in the British Museum, and is justly considered the most valuable of its archaeological treasures. The lid of the coffin which contained the royal mummy was inscribed with the name of its occupant, Pharaoh Myderimus, who succeeded the heir of the builder of the great pyramid, about two centuries before Christ. Only think of it—the monarch whose crumbling bones and leamery integuments are now exciting the wonder of numerous gazers in London, reigned in Egypt before Solomon was born, and only about eleven centuries or so after Mizraim the grandson of the old father Noah and the first of the Pharaohs, had been gathered to his fathers! Why, the tide mark of the deluge could scarcely have been obliterated, or the gopher wood knee timbers of the ark have rotted on Mount Ararat, when this man of the early world lived, moved and had his being! His flesh and blood were contemporary with the progenitors of the great patriarch! His bones and shrouded skin were contemporary with the nineteenth century, and the date of the Crucifixion is only about midway between his era and ours.

News has just reached us from Belize Honduras, of the death from cholera of a black hero, Corporal Samuel Hodge, of the 4th West India Regiment. Corporal Hodge received the Victoria Cross as a reward for his bravery at the storming of the Marabout town of Toobarb Colony, in the River Gambia, in June, 1866, he having responded to the call of Colonel D'Arcy, the Governor of the Gambia, and gallantly followed that brave officer into the Mahomedan stockade, which was bristling thick with the guns of the enemy. Corporal Hodge was the first and only black soldier who ever received from the Sovereign the honour of the Victoria Cross, and his untimely death is much deplored by his regiment—*Army and Navy Gazette.*

If you wish the very best CABINET PHOTOGRAPHS, you must call on BRADLEY & RULOVSON, 429 Montgomery street, San Francisco.

I SAW HER BUT A MOMENT.—She wore a handsome crinoline on the day when first we met; and she seduced like a schooner, with a cloud of canvas set. As she swept along the pavement, with a grandeur fit to kill, I saw her still.

The wind was on a bender, and as sassy as a witch and it played the very dickens with dust, dimity and such. The gaiters were delicious, which her feet were made to fill, I saw her but a moment, yet methinks I see her still!

She scooted round the corner, and streaming out behind, her crinoline and calico were romping in the wind; to have kept her in position, which baffled twice her skill, I saw her but a moment, yet methinks I see her still.

I shut my eyes, I thought, for I didn't want to see, a display of pretty ankles when it wasn't meant for me; and until I lose my sense I am sure I never will, I saw her but a moment, yet methinks I see her still!

THE MONT CENIS TUNNEL.—It appears that at the close of 1867 four miles and 5,025 feet of this tunnel had been completed, leaving two miles and 4,018 feet still to be pierced. The distance pierced in 1867 was 5040 feet, as compared with 3416 feet in 1866, 4079 feet in 1865, 3626 feet in 1864, 2673 feet in 1863, 2076 feet in 1862, 1,210 feet in 1861, 1,144 feet in 1860, and 2889 feet in the preceding years. The outlay made upon this remarkable and important work (which has not been more than ten years on hand) amounted at the close of 1867 to about £1,700,000. It is now hoped that the tunnel will be completed in 1871. Its length when finished will be seven miles 3773 feet, and its total cost will be about £2,500,000, or something more than £300,000 per mile.

to the Prince of Wales on the occasion of his Royal Highness presiding at the annual festival of the Benevolent Society of St. Patrick on Tuesday the London Irish 'B' or Captain O'Connell's company, gave a ball in celebration of the patron saint. This entertainment, which was carried out under the direction of Lieutenant Chisholm, Color Sergeant Crispin, and a committee of the company, took place at St. George's hall Gray's-inn-road.

HOLLOWAY'S OINTMENT AND PILL.—The Joy of Home.—How often does it happen that happiness is driven from our hearths by illness? Sickness and sorrow are constant companions; though in most cases their tenure is short when Holloway's remedies are used to dispossess them. These medicaments can be confidently and heartily recommended to all invalids as the most easy, safe, and certain means of preserving all that is good, and casting out all that is corrupt, externally and internally. They are universally applicable by both sexes in every disease. Holloway's medicaments do not deteriorate by being kept, now are their properties changed by climate; they can be purchased everywhere, and the price at which they are sold is moderate.

TAKE AYER'S CHERRY PECTORAL to stop your Colds, Coughs and Bronchial Affections before they run into Consumption that you cannot stop.

FRED PAYNE has removed his Cheap Shaving Shop to the opposite side of Johnson street, just above the Miner's Saloon.

French Medicines,

PREPARED BY

GRIMAULT & CO.

Chemists to H.I.P. Prince Napoleon,

PARIS.

These different medicines represent the most recent

medical discoveries, founded on the principles of Chem-

istry and Therapeutics. They must not be confounded

with secret or quack medicines, as their names suffi-

ciently indicate their composition; a circumstance which

has caused them to be appreciated and prescribed by the

Faculty in the whole world. They widely differ from

those numerous medicines advertised in the public

papers as able to cure every possible disease, as they are

applicable only to but a very few complaints. The most

stringent laws exist in France with regard to the sale of

medical preparations, and only those which have under-

gone an examination by the Academy of Medicine

and have been proved efficacious, either in the hospitals

or in the practice of the first medical men, are authorised

by the Government. This fact must be a guarantee for

the excellence of Messrs. Grimault & Co.'s Medi-

Insurance.

ROYAL

INSURANCE COMPANY

FIRE AND LIFE.

Head Offices—Liverpool & London.

Capital—£2,000,000 Stg.

Accumulated Funds in hand £1,200,000 Stg.

ANNUAL INCOME—£700,000 Sterling.

Chairman—Charles Turner, Esq., M.P.
Manager and Actuary—Percy M. Dove, Esq.

Fire Department.

The undersigned, Agents, will receive proposals and effect Insurances on all classes of Fire risks. The Company is enabled to direct the attention of the public with every confidence to the advantages offered in this Branch.

The guarantee of an ample Capital, besides an accumulated Fire Reserved Fund of over £110,000 sterling.

Moderate Premiums.

Prompt and Liberal settlement of Losses.

Loss and damage by explosion of Gas made good.

Life Department.

In accordance with the resolution passed at the last Annual Meeting of the Shareholders, the Agents are authorized to give

SPECIAL NOTICE

The present participating Policy-holders, and all holders of participating Policies issued after 1st January 1868, will become entitled to an increased share of the Profits.

The undersigned, Agents, also wish to direct the attention of the public to some other of the advantages offered by the Company in this Department.

In addition to the guarantee of an ample Capital, the very large Life Reserved Fund of over £900,000.

French Medicines.

PREPARED BY
GRIMAULT & CO.
Chemists to H.I.P. Prince Napoleon,
PARIS.

These different medicines represent the most recent medical discoveries, founded on the principles of Chemistry and Therapeutics. They must not be confounded with secret or quack medicines, as their names sufficiently indicate their composition; a circumstance which has caused them to be appreciated and prescribed by the Faculty in the whole world. They widely differ from those numerous medicines advertised in the public papers as able to cure every possible disease, as they are applicable only to but a very few complaints. The most stringent laws exist in France with regard to the sale of medical preparations, and only those which have undergone an examination by the Academy of Medicine and have been proved efficacious, either in the hospitals or in the practice of the first medical men, are authorized by the Government. This fact must be a guarantee for the excellence of Messrs. Grimault et Co.'s Medicines.

NO MORE COD LIVER OIL

Grimault's Syrup of Iodized Horse Radish.

This medicine has been administered with the utmost success in the Hospitals of Paris. It is a perfect substitute for Cod Liver Oil, and has been found most beneficial in Diseases of the Chest, Scrofula, Lymphatic Disorders, Green Sickness, Muscular Atony, and Loss of Appetite. It regenerates the constitution in purifying the blood, it being the most powerful depurative known. It has also been applied with happy results in Diseases of the Skin. Further, it will be found to be of great benefit to young children subject to Humors and Obstructions of the Glands.

CONSUMPTION CURED!

Grimault's Syrup of Hypophosphite of Lime.

This new medicine is considered to be a sovereign remedy in case of Phthisis and other Diseases of the Lungs. It promptly removes the most serious symptoms. The cough is relieved, night perspirations cease and the patient is rapidly restored to health.

N.B.—Be sure to see that the signature of Grimault & Co. is affixed to the bottle, as this Syrup is liable to imitations.

NO MORE DIFFICULT OR PAINFUL DIGESTION!

DR BURIN DU BUISSON'S DIGESTIVE LOZENGES

This delicious preparation is always prescribed by the most reputed medical men in France in cases of derangements of the digestive organs, such as

Gastritis,
Gastralgia,
Long and laborious Digestion,
Wind in the Stomach and Bowels,
Emaciation,
Jaundice, and
Complaints of the Liver & Lungs

NERVOUS HEADACHE, NEURALGIA, DIARRHOEA, DYSENTERY, INSTANTLY CURED BY

Grimault's Guarana.

This vegetable substance, which grows in the Brazilia has been employed since time immemorial to cure Inflammation of the Bowels. It has proved to be of the greatest service in cases of Cholera, as it is a preventive and a cure in cases of Diarrhoea.

NO MORE COPAIBA OR CUBEBS!

Grimault's Capsules and Liquid Extract of Matico Vegetalis.

Where all other preparations have failed these preparations will always effect a cure. These insure rapid and extraordinary cure of severe recent and chronic cases of private diseases. They are used in the hospitals of Paris, by the celebrated Dr Ricard, and found greatly superior to all hitherto known mineral remedies and Copals and Cubebs. The Injection is used in recent, and capsules in more chronic cases.

GENERAL DEPOTS:
